ZONING & INCENTIVES OVERVIEW

ZONING: C-5-DC

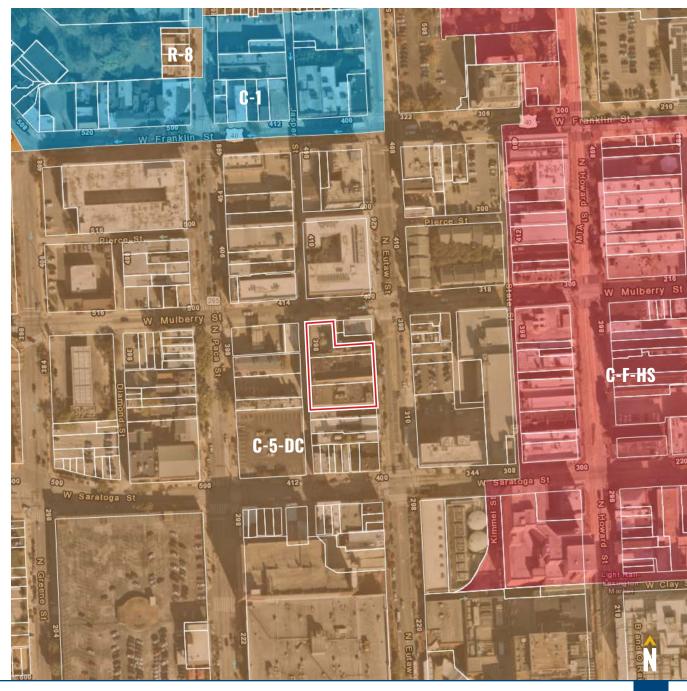

Downtown District (Downtown Core Subdistrict) Baltimore City, MD

The C-5 Downtown Zoning District is intended for Baltimore's Downtown and accommodates a wide range of uses normally associated with the downtown of a major city. The C-5 District standards are crafted to: (1) maintain or improve the pedestrian environment; (2) ensure that new construction is compatible with existing development; and (3) develop a greener downtown.

In order to address the different character areas that make up Downtown, the C-5 District is divided into the following subdistricts, for which varied bulk and yard regulations are provided to recognize the different physical characteristics of Downtown.

The purpose of the C-5-DC Downtown Core Subdistrict is to establish these standards for structures located within the majority of Downtown.

The standards recognize that this subdistrict is to be the most intensely developed portion of Downtown and is to be predominately pedestrian-oriented in nature.

Tower History

Located at 21 S. Eutaw Street, The Bromo Seltzer Arts Tower (originally The Emerson Tower), has been a Baltimore landmark since its construction in 1911 and was the tallest building in Baltimore at the time. Listed on the National Register of Historic Places, the tower was modeled after the Palazzo Vecchio in Florence and built by Captain Isaac Emerson. Captain Emerson invented the headache remedy Bromo Seltzer and had a genuine interest in the City of Baltimore.

After an extensive renovation, the Baltimore Office of Promotion & The Arts officially opened the Bromo Seltzer Arts Tower with studio spaces for visual and literary artists in 2008 and a full restoration of the clock was completed in 2017.
